You can create a list of your cited publications and see your h-index using the **Web of Science** database.

If you have a ResearcherID account, use that profile to create your citation information.

**Viewing your cited publications**

- From the Library homepage > Databases > Search by databases A-Z list > W > Web of Science
- Use the default database **Web of Science Core Collection**
- Select **More** and select **Author Search** to enable you to narrow by Research Domain and Organization
  
  ![Web of Science search interface](image)

- Enter your **Last Name/Family Name** and **Initial(s)**. If you publish under multiple names, use the **+ Add Author Name Variant** to add your other names
- Choose **Select Research Domain** and then choose **All Research Domains**
  
  ![Select Research Domain](image)

- Go to **Select Organization** to choose one or more institutional affiliations
- Select **Finish Search** to run the revised search
- At the **Author Search Results**: click on **Article Groups** and select the sets that are appropriate, and then select **View Records**
  
  ![Author Search Results](image)

- Sort the list by Times cited – highest to lowest

**To view your total number of citations and h-index**

- Once you have a list of publications select **Create Citation Report**
  
  ![Create Citation Report](image)

- The search results will be collated and shown as graphs and statistics including your h-index. On this page you can also remove unwanted citations from the Marked List, or restrict to items published between a specific date range
The citations are sorted by the number of times they have been cited from highest to lowest together with the number of cites per year.
